ACCOMMODATION MODULE

New residential solution
from **CBC-Module LLP**

ABOUT US

CBC- Module LLP- is leading Kazakhstan plant located in Almaty that specializes in the sphere of design, production and completing of multifunctional module buildings (MB) and metal structures of hangar type buildings (MS). It has been operating on Kazakhstan market since 1981.

Website of the plant <http://module-sw.kz/>

Accommodation module (AM) is the innovation of the plant and is designed for comfortable living inside/outside of the residential areas. Our house is a good option designed for a wide range of customers at reasonable price.

Large scale production of AM (up to 150 per month), includes the complete production cycle starting from the manufacture of the metal frame outer and inner finishing work, including plumbing, engineering, kitchen equipment and furniture.

ACCOMODATION MODULE

ADVANTAGES

1

High maintenance quality

AM meets the requirements of the codes applicable in Kazakhstan. All materials are certified. High heat isolating characteristics save up to 50% of heating expenses. Exclusive feature of AM is high level of acoustic isolation.

2

Environmental compatibility

Use of high quality construction materials and high technology manufacturing enables to build eco, "breathing houses" with a healthy micro climate.

3

Easy installation

AM have standard transport size and can be transported without special requirements. Hard structure of the bearing metal frame and small weight of AM do not require solid foundation. AM is ready to be used after installation on the basement and connection to engineering networks. Transformative nature of AM allows compatibility of AM between each other and installation of 3 storey houses. AM can be dismantled and removed to other areas if necessary.

4

High earthquake resistance

AM can be used in the areas of high seismic activity of magnitude up to 10 Richter scale

5

Flexibility

Due to flexibility of the structure AM can be formed into accommodation spaces of various configuration for comfortable living. Residential areas made AM enable to create diverse architectural and planning concepts.

6

Affordable price

Large scale manufacture of AM enables to decrease the manufacturing expenditures and set the minimum price. According to specialists' research AM are cheaper by 30-40% than the similar products manufactured using "traditional technologies". Peculiarities of AM provide opportunity for stage construction of residential areas that accordingly leads to performance based financing.

OUR CLIENTS

AM constructions are highly appreciated by the clients from across the globe

Why work with us?

- ✓ Complete package of state licenses and permits
- ✓ Own construction, technical and manufacturing resource
- ✓ Qualified and experienced staff
- ✓ Delivery of the manufactured products to any region of Kazakhstan or CIS countries
- ✓ ISO 9001-2009
- ✓ Warranty service and post warranty service of the delivered product

Construction is easy!

Welcome to long-term
cooperation with us.
